

My Vivid Vision provider is:

Vivid Vision Home is a visual rehabilitation software designed to treat patients with amblyopia, strabismus, convergence insufficiency, poor stereopsis and other disorders of binocular vision.

It offers a suite of vision therapy games and activities configured remotely by your eye care provider for ongoing in-home treatment.

Vivid Vision Home is the only globally-prescribed home VR vision therapy tool on the market that combines the latest in virtual reality with tried and true vision therapy techniques.

Features of the Vivid Vision system:

- Vision therapy exercises from the comfort of the patient's home and on their own schedule
- Supplemental, maintenance care and/or as an alternative to in-office treatment
- Fun and engaging interactive games and activities

INDICATED USE

Vivid Vision is a computer-based application with data tracking and analysis tools. The device is intended to identify strabismus (eye muscle imbalance), to assess binocular vision (use of both eyes to see), to treat suppression and amblyopia (dimness of vision without any apparent disease of the eye), and to treat problems of vergence (inability to direct the two eyes at the same location).

All diagnosis questions pertaining to your vision therapy must be directed to your Vivid Vision Provider.

How do I get started?

STEP ONE

Get your headset*

STEP TWO

Set up your account

STEP THREE

Download the Vivid Vision app and play!

"Vivid Vision has been an answer to prayer for our family since we are able to do it from home with less traveling back and forth."

Bridgette Olinghouse

"Vivid Vision Home allows the flexibility and portability for busy adults, like me, to achieve life-changing results in the comfort of their own homes whenever they want!"

Chris LaPlante

"I think my vision is really starting to stabilize after a few months of Vivid Vision! I am now reading at the same pace as my peers in my masters program at Johns Hopkins"
